Robotic Massage® Chair

Welcome to the perfect fit for your body, budget, schedule and style.

The Human Touch® iJoy® Robotic Massage® Chair is not your grandfather's old massage chair (as much as he wishes it were). In just 15 minutes per day, this stylish, technologically advanced chair expertly melts away the tension and stress of everyday life, alleviating pain, improving relaxation and soothing sore muscles.

Grab a seat and let the patented Human Touch Technology® do what it does best—replicate the therapeutic techniques used by back and spinal care professionals. The iJoy® chair follows the contour of the spine to provide a targeted, effective massage, once available only in chairs twice its cost. While it may not cost a fortune, its leather-like upholstery looks and feels like a million bucks. So discover the iJoy® and enjoy a beautiful massage from a beautiful chair.

More Features for More Comfort

MASSAGE CONTROLLER
- It's all at your fingertips

DIMENSIONS

PART NUMBER:

-  100-2720-008 (Black - PU)
-  100-2720-009 (Bone - PU)
-  100-2720-010 (Espresso - PU)

Features your couch can only dream of.

There's a reason the iJoy® is the most popular piece of furniture in any room. In fact, there are many reasons. These advanced, fashion-forward chairs are loaded with the things dreams are made of. Or, should we say, sweet dreams.

RELIEF ZONE

Flip back the head pillow to reveal a 'relief zone', a unique feature that allows for a penetrating, deep-tissue cervical massage.

ERGONOMIC CONTOUR BACK

Ergonomic contours provide exceptional comfort and back support with or without engaging the Human Touch Robot. This ensures that the iJoy® is a comfortable chair to sit in, even when you are not getting an invigorating massage.

RETRACTABLE CUP HOLDER

Fingertip-released, pop-out cup holder provides instant refreshment support.

PANORAMIC SWIVEL BASE WITH TRANSPORT ROLLER

The chair rests on a swivel base that rotates left and right. A transport roller on back of the base allows for mobility.
